

MANAGE 'KNOWLEDGE' AND CAPTURE YOUR FIRM'S 'COLLECTIVE EXPERIENCE' FOR BUSINESS ADVANTAGE

Lexsoft T3 is a proven, scalable, enterprise-level knowledge management system. Fully cloud compatible, **T3** helps law firms to surface and access business-critical knowledge that resides in their iManage Work document and email management system.

Components of T3

The **T3** components that provide robust and comprehensive workflows, metadata, and automation, to facilitate a highly customisable knowledge search capability are:

T3 Publish: Enables document submission to the core knowledge management engine

T3 Publication: Assists with creation of multiple publication workflows based on varied approval schemas

T3 Classify: Facilitates appropriate categorisation and classification of every piece of 'knowledge' submitted

T3 Control: Manages multi-level taxonomies in multiple languages, supported with synonyms

T3 Search: Enables advanced search based on multi-filtering capability for fast and accurate results

T3 Analytics: Provides user insights to help to continuously fine-tune law firms' knowledge management initiative

T3 Migration Tool: Helps to import large metadata sets to the tune of 1000s of documents into **T3** via an in-built process in the system

T3 Rest API: Allows **T3** to connect to and communicate with external knowledge initiatives, third-party sources and generative AI interfaces. Enables creation of customised workflows

T3 Redact: Automates redaction of documents for storage in **T3**, eliminating need for human intervention. This is an optional module

ABOUT LEXSOFT

Lexsoft provides IT and business process solutions to the legal sector across Europe, United States and Latin America. The company assists law firms and corporate legal departments (CLD) to improve their document management, knowledge management, practice management, and CRM processes, to facilitate business efficiency, improve productivity and reduce risk. The company's **Lexsoft T3** is a proven knowledge management solution, offering one of the most comprehensive workflows for this business function.
